Trade-marks Journal
Vol. 63 No. 3200

General Information

The *Trade-marks Journal* is published every week in compliance with Rule 15 of the *Trade-marks Regulations*. The Registrar of Trade-marks cannot guarantee the accuracy of this publication, nor assume any responsibility for errors or omissions or the consequence of these. All mail relating to trademarks should be addressed to the Registrar of Trade-marks, 50 Victoria Street, Gatineau, Quebec, Canada, K1A 0C9.

Electronic *Trade-marks Journal*

The *Trade-marks Journal* is available in electronic form on the CIPO web site (http://cipo.gc.ca). The *Journal* is available in PDF format and can be downloaded free of charge, viewed and printed with Adobe Acrobat Reader. The electronic form of the *Trade-marks Journal* is the official version.

The *Journal* is also available in a printable HTML format as an alternate official version, and contains a search function to narrow and customize the *Journal* content to user defined areas of interest.

Official Languages

The *Journal* is available in English and in French. The application details are displayed based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the Journal are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the Journal have been translated. Any registration resulting from the application will be restricted to these goods or services described therein.

Filing Dates

The filing date of each trademark application advertised in the *Trade-marks Journal*, including those to extend the statement of goods or services of an existing registration, is shown next to the application number in the sequence of Year, Month and Day.

Nice Classification

The *Journal* includes reference to the Nice classification when the goods or services of an application have been grouped and classed by the applicant in accordance with the current version and edition of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see section 38 of the *Trade-marks Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Trade-marks Journal* may file a statement of opposition with the Registrar of Trade-marks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

GOODS

(1) Computer hardware; integrated circuits; system-on-chip integrated circuits; microprocessors; processors [central processing units]; chips [integrated circuits]; application specific integrated circuits; graphics processing units namely integrated circuit components for graphics; semiconductor intellectual property cores; instruction set architectures; RISC-based instruction set architectures; microcontrollers; electronic chips for the manufacture of integrated circuits; interfaces for computers namely computer interface boards, computer interface cards, bus interfaces [integrated circuits]; printed circuit boards; electronic circuit boards; telephones; mobile computing devices, namely portable computers, laptop computers, notebook computers, subnotebook computers, ultra-mobile computers, tablet computers, Internet tablet computers, personal portable computers, personal digital assistants, personal digital assistants with integrated mobile telephone functionality, mobile telephones, smart phones, handheld computers, handheld game consoles, Global Positioning System (GPS) consisting of computers, computer software, transmitters, receivers and network interface devices, navigation apparatus for vehicles in the form of on-board computers and personal media players; computer servers; motion sensors, optical sensors, proximity sensors, timing sensors, thermal sensors, acceleration sensors, temperature sensors, pressure sensors and pollutant sensors; smart devices, namely smart cards, smart card readers, smart meters, smart remote controllers, smart wrist bands, smart watch phones and smart pens; wearable mobile devices, namely arm bands, fitness bands, computer watches, wristbands and head-worn computing devices; wearable computers; set top boxes; modems; video encoders and transcoders; electronic book readers; computer data terminals; apparatus for wireless communications namely radio transmitters and receivers for telecommunication; televisions; smart televisions; horizontal surface computers; mp3 players; mp4 players; electronic security devices namely security scanners, security sensors, personal security alarms, security and fire alarms; electronic smart lighting devices namely electric control systems for lighting systems, lighting control panels; electronic energy monitoring devices namely home temperature monitors and control panels; computer software used in and for use in the design, development, modelling, simulation, compiling, de-bugging, verification, construction and interfacing of integrated circuits, microprocessors, microprocessor cores, semiconductor intellectual property cores, architecture extensions to semiconductor intellectual property cores, macro cells, microcontrollers, bus interfaces and printed circuit boards; computer software used in, and for use in the design, development, modelling, simulation, compiling, de-bugging, verification, construction and interfacing of application software and operating system software to run on integrated circuit based devices; microprocessor design files; computer operating programs; security software; electronic publications (downloadable or streamable) all relating to electronic equipment, microprocessors, computer hardware, computer software, integrated circuit based devices and internet-of-things devices.

(2) Printed publications all relating to electronic equipment, microprocessors, system-on-chip devices, processors [central processing units], chips [integrated circuits], application specific integrated circuits, graphics processing units, semiconductor intellectual property cores, instruction set architectures, RISC-based instruction set architectures; printed materials all relating to processor-based devices, integrated circuits, computer hardware, computer software, integrated circuit based devices and internet-of-things devices; instruction manuals relating to design and development of electronic equipment, microprocessors, system-on-chip devices, processors [central processing units], chips [integrated circuits], application specific integrated circuits, graphics processing units, semiconductor intellectual property cores, instruction set architectures, RISC-based instruction set architectures; instruction manuals relating to design and development of processor-based devices, integrated circuits, computer hardware, computer software, integrated circuit based devices, internet-of-things devices, macro cells, microcontrollers, bus interfaces and printed circuit boards; user and development manuals all relating to the design and development of electronic equipment, microprocessors, system-on-chip devices, processors [central processing units], chips [integrated circuits], application specific integrated circuits, graphics processing units, semiconductor intellectual property cores, instruction set architectures, RISC-based instruction set architectures; user and development manuals all relating to the design and development of processor-based devices, integrated circuits, computer hardware, computer software, integrated circuit based devices, internet-of-things devices, microprocessor cores, architecture extensions to semiconductor intellectual property cores, macro cells, microcontrollers, bus interfaces and printed circuit boards; printed materials concerning the performance and technical characteristics of electronic equipment, microprocessors, system-on-chip devices, processors [central processing units], chips [integrated circuits], application specific integrated circuits, graphics processing units, semiconductor intellectual property cores, instruction set architectures, RISC-based instruction set architectures; printed publications concerning the performance and technical characteristics of processor-based devices, integrated circuits, computer hardware, computer software, integrated circuit based devices, internet-of-things devices, microprocessor cores, architecture extensions to semiconductor intellectual property cores, macro cells, microcontrollers, bus interfaces and printed circuit boards.

SERVICES

(1) Advertising services for others and developing promotional campaigns for others relating to electronic equipment, microprocessors, system-on-chip devices, processors [central processing units], chips [integrated circuits], application specific integrated circuits, graphics processing units, semiconductor intellectual property cores, instruction set architectures, RISC-based instruction set architectures; advertising services for others and developing promotional campaigns for others relating to processor-based devices, integrated circuits, computer hardware, computer software, integrated circuit based devices and internet-of-things devices.

(2) Maintenance and support services relating to electronic equipment, microprocessors, system-on-chip devices, processors [central processing units], chips [integrated circuits], application specific integrated circuits, graphics processing units, semiconductor intellectual property cores, instruction set architectures, RISC-based instruction set architectures, processor-based devices, integrated circuits, computer hardware, computer software, integrated circuit based devices and internet-of-things devices.

(3) The transmission of computer software, data and information in the field of design and development of electronic data processing equipment, microprocessors, system-on-chip devices, processors, chips, application specific integrated circuits, graphics processing units, semiconductor intellectual property cores, instruction set architectures, RISC-based instruction set architectures, processor-based devices, integrated circuits, computer hardware, computer software, integrated circuit based devices, electronic devices that send and receive data in a connected network, microprocessor cores, macro cells, microcontrollers, bus interfaces and printed circuit boards via the Internet and computer communication networks; providing on-line chat rooms, bulletin boards and community forums for the transmission of messages among computer users.

(4) Provision of manuals, articles, tutorials, newsletters, books, magazines, journals, brochures, research papers and white papers in the area of electronic equipment, microprocessors, system-on-chip devices, processors [central processing units], chips [integrated circuits], application specific integrated circuits, graphics processing units, semiconductor intellectual property cores, instruction set architectures, RISC-based instruction set architectures; provision of manuals, articles, tutorials, newsletters, books, magazines, journals, brochures, research papers and white papers in the area of processor-based devices, integrated circuits, computer hardware, computer software, integrated circuit based devices and internet-of-things devices; publication of educational and training books, texts and computer software in the area of electronic equipment, microprocessors, system-on-chip devices, processors [central processing units], chips [integrated circuits], application specific integrated circuits, graphics processing units, semiconductor intellectual property cores, instruction set architectures, RISC-based instruction set architectures; publication of educational and training books, texts and computer software in the area of processor-based devices, integrated circuits, computer hardware, computer software, integrated circuit based devices and internet-of-things devices; provision of education and training in the area of electronic equipment, microprocessors, system-on-chip devices, processors [central processing units], chips [integrated circuits], application specific integrated circuits, graphics processing units, semiconductor intellectual property cores, instruction set architectures, RISC-based instruction set architectures; provision of education and training in the area of processor-based devices, integrated circuits, computer hardware, computer software, integrated circuit based devices and internet-of-things devices; providing online electronic publications in the area of electronic equipment, microprocessors, system-on-chip devices, processors [central processing units], chips [integrated circuits], application specific integrated circuits, graphics processing units, semiconductor intellectual property cores, instruction set architectures, RISC-based instruction set architectures; providing online electronic publications in the area of processor-based devices, integrated circuits, computer hardware, computer software, integrated circuit based devices and internet-of-things devices; production of radio, television and Internet programmes in the area of electronic equipment, microprocessors, system-on-chip devices, processors [central processing units], chips [integrated circuits], application specific integrated circuits, graphics processing units, semiconductor intellectual property cores, instruction set architectures, RISC-based instruction set architectures; production of radio, television and Internet programmes in the area of processor-based devices, integrated circuits, computer hardware, computer software, integrated circuit based devices and internet-of-things devices; organising and conducting events, exhibitions, workshops, courses, seminars, training and conferences in the area of electronic equipment, microprocessors, system-on-chip devices, processors [central processing units], chips [integrated circuits], application specific integrated circuits, graphics processing units, semiconductor intellectual property cores, instruction set architectures, RISC-based instruction set architectures; organising and conducting events, exhibitions, workshops, courses, seminars, training and conferences in the area of processor-based devices, integrated circuits, computer hardware, computer software, integrated circuit based devices and internet-of-things devices; arranging and

conducting competitions, quizzes and lotteries in the area of electronic equipment, microprocessors , system-on-chip devices, processors [central processing units], chips [integrated circuits], application specific integrated circuits, graphics processing units, semiconductor intellectual property cores, instruction set architectures, RISC-based instruction set architectures; arranging and conducting competitions, quizzes and lotteries in the area of processor-based devices, integrated circuits, computer hardware, computer software, integrated circuit based devices and internet-of-things devices; provision of audiovisual content on-line via a global computer network or internet in the area of electronic equipment, microprocessors, system-on-chip devices, processors [central processing units], chips [integrated circuits], application specific integrated circuits, graphics processing units, semiconductor intellectual property cores, instruction set architectures, RISC-based instruction set architectures; provision of audiovisual content on-line via a global computer network or internet in the area of processor-based devices, integrated circuits, computer hardware, computer software, integrated circuit based devices and internet-of-things devices.

(5) Design and creation of intellectual property and related rights; research, development, design, technical consultancy and technical support services, all relating to electronic equipment, microprocessors, system-on-chip devices, processors [central processing units], chips [integrated circuits], application specific integrated circuits, graphics processing units, semiconductor intellectual property cores, instruction set architectures, RISC-based instruction set architectures; research, development, design, technical consultancy and technical support services, all relating to processor-based devices, integrated circuits, computer hardware, computer software, integrated circuit based devices, internet-of-things devices, microprocessor cores, architecture extensions to semiconductor intellectual property cores, macro cells, microcontrollers, bus interfaces and printed circuit boards; research, development, design, technical consultancy and technical support services , all relating to computer software; research, development, design, technical consultancy and technical support services, all relating to computer software used in and for use in the design, development, modelling, simulation, compiling, de-bugging, verification, construction and interfacing of integrated circuits, microprocessors, microprocessor cores, semiconductor intellectual property cores and architecture extensions to semiconductor intellectual property cores; research, development, design, technical consultancy and technical support services, all relating to computer software used in and for use in the design, development, modelling, simulation, compiling, de-bugging, verification, construction and interfacing of macro cells, system-on-chip devices, micro-controllers, bus interfaces and printed circuit boards; research, development, design, technical consultancy and technical support services, all relating to computer software used in and for use in the design, development, modelling, simulation, compiling, de-bugging, verification, construction and interfacing of application software and operating system software to run on integrated circuit based devices; research, development, design, technical consultancy and technical support services, all relating to computer software used in servers, operating system software, web services software, and security and cryptographic software; Licensing of intellectual property and related rights; licensing of microprocessor designs; licensing of semiconductor intellectual property cores, instruction set architectures, RISC-based instruction set architectures and architecture extensions to semiconductor intellectual property cores; licensing of technology and computer software.

(6) Design and creation of intellectual property and related rights; research, development, design, technical consultancy and technical support services, all relating to electronic equipment, microprocessors, system-on-chip devices, processors [central processing units], chips [integrated circuits], application specific integrated circuits, graphics processing units, semiconductor intellectual property cores, instruction set architectures, RISC-based instruction set architectures; research, development, design, technical consultancy and technical support services, all relating to processor-based devices, integrated circuits, computer hardware, computer software, integrated circuit based devices, internet-of-things devices, microprocessor cores, architecture extensions to semiconductor intellectual property cores, macro cells, microcontrollers, bus interfaces and printed circuit boards; research, development, design, technical consultancy and technical support services , all relating to computer software; research, development, design, technical consultancy and technical support services, all relating to computer software used in and for use in the design, development, modelling, simulation, compiling, de-bugging, verification, construction and interfacing of integrated circuits, microprocessors, microprocessor cores, semiconductor intellectual property cores and architecture extensions to semiconductor intellectual property cores; research, development, design, technical consultancy and technical support services, all relating to computer software used in and for use in the design, development, modelling, simulation, compiling, de-bugging, verification, construction and interfacing of macro cells, system-on-chip devices, micro-controllers, bus interfaces and printed circuit boards; research, development, design, technical consultancy and technical support services, all relating to computer software used in and for use in the design, development, modelling, simulation, compiling, de-bugging, verification, construction and interfacing of application software and operating system software to run on integrated circuit based devices; research, development, design, technical consultancy and technical support services, all relating to computer software used in servers, operating system software, web services software, and security and cryptographic software; Licensing of intellectual property and related rights; licensing of microprocessor designs; licensing of semiconductor intellectual property cores, instruction set architectures, RISC-based instruction set architectures and architecture extensions to semiconductor intellectual property cores; licensing of technology and computer software.

(7) Licensing of intellectual property and related rights; licensing of microprocessor designs; licensing of semiconductor intellectual property cores, instruction set architectures, RISC-based instruction set architectures and architecture extensions to semiconductor intellectual property cores; licensing of technology and computer software.

GOODS

(1) Dietary and nutritional supplements for general health and well-being

(2) Pre-operative supplements to decrease inflammation, support healthy immune balance, protect against free radicals and to balance blood sugar levels.

(3) Post-operative supplements to support a balanced immune system and to stimulate tissue repair and collagen production

(4) Post-operative supplements to decrease inflammation, support healthy immune balance, protect against free radicals and to balance blood sugar levels.

(5) Pre-operative and post-operative supplements to combat stress, support intestinal health, and improve immune function

(6) Supplements to decrease scarring and decrease bruise formation

(7) Pre-operative and post-operative supplements to provide support during the inflammatory phase of healing and to regulate inflammation

(8) Pre-operative and post-operative supplements to provide micronutrients to assist the body with tissue repair, to support healthy tissue and collagen, and to support a healthy pH balance

(9) Post-operative supplements to aid digestion and boost the immune system

(10) Supplements to support healthy bowel movements and prevent diarrhea and dehydration

(11) Supplements for strong hair and nail growth

(12) Supplements to decrease bruising and swelling

(13) Dietary and nutritional supplements to promote healthy aging.

(14) Supplements to maintain healthy weight management

(15) Supplements to maintain and support lean body mass

(16) Digestive aid supplements

(17) Topical hyaluronic acid formulations

(18) Electrolyte beverages

(19) Dietary and nutritional supplements, namely, powdered drink mixes for use for rehydration and for reversing fatigue

(20) Supplements to support a healthy pH balance

(21) Dietary and nutritional supplements, namely protein powder
